In reply to your letter
dated 27 July 1993

Subject: Use of material "Simsite"
for seawater pump impellers
According to documentation as per attached list

Gentlemen,

We have your above referenced letter submitting copies of documentation on the above subject material and with regard thereto we are pleased to advise that insofar as our requirements for classification are concerned, the details as indicated appear to be satisfactory and, accordingly, we would have no objections to the use of material "Simsite" for the above subject application on vessels classed with this Bureau.

One (1) copy each of the submitted documentation stamped to indicate our review is being returned.

Very truly yours,

Robert L. Thomas
Director Engineering
