

Testimonials

Product: Simsite® Composite Pumps and Pump Parts

**Different Industries – Different Issues - ONE SOLUTION!
Simsite® Composite Pumps and Parts**

“Even though the Sims impellers cost a bit more than OEM bronze parts, it is a good investment. We are continuously replacing the OEM impellers and wear rings with new Simsite® impellers as they become worn out in our sea water pumps.”
~ Mats Bodlund, First Engineer
M/V Star Pisces

“The impeller we purchased from SIMS 5 years ago is as good as the day it was installed, and better than the original cast impeller, well worth the investment!”
~ David O'Donnel, CPO, AFO,
Operations Manager,
Hatfield Aquatic Center

“Great quality material and workmanship.”
~Tom Moffett, Shop Supervisor,
Controls Engineering Maintenance Corp

“Sims impellers are very well made and of good quality, the impeller has been running over 500 hours with no issues“
~Mikael Henriksson, Chief Engineer,
M/V Stena Freighter
