OVERHAUL, REPAIR & UPGRADE YOUR PUMPS

Sims Since 1919
U.S. Manufacturer Of
Pumps Impellers, and Other
Pump Part Upgrades

A much better alternative to purchasing new pumps (most of which are now cast in China or India) is to send your existing pumps to the SIMS PUMP COMPANY for Overhaul, Repair & Upgrade!

All pumps that are sent to the SIMS PUMP FACTORY are blasted & repaired, coated with a molecular compound, upgraded with SIMSITE® Impellers & Casing Rings, Sleeves, Mechanical Seals, Bearings, and Stabilizing Bushings. The pumps are upgraded with the best superior quality parts, then assembled and tested. Since SIMS PUMP manufactures all pump products (even obsolete parts) in Hoboken, New Jersey, they can upgrade any centrifugal pump!

BEFORE REPAIR

AFTER OVERHAUL, UPGRADE & REPAIR with a SIMSITE® Structural Composite Impeller, Casing Rings, Mechanical Seals, Sleeves, and Stabilizing Bushings
